

# 183 TOLL NORTH END NOW OPEN

## OVERVIEW

The 183 South Project is adding three tolled lanes in each direction on an 8-mile stretch of US 183 between US 290 and SH 71. When the project is complete, it will offer drivers a non-stop, signal free route to get to their destination without delay. This key north-south alternative to I-35 will provide significant improvements to the corridor including enhanced non-tolled general-purpose lanes, and an extensive network of bicycle and pedestrian accommodations.

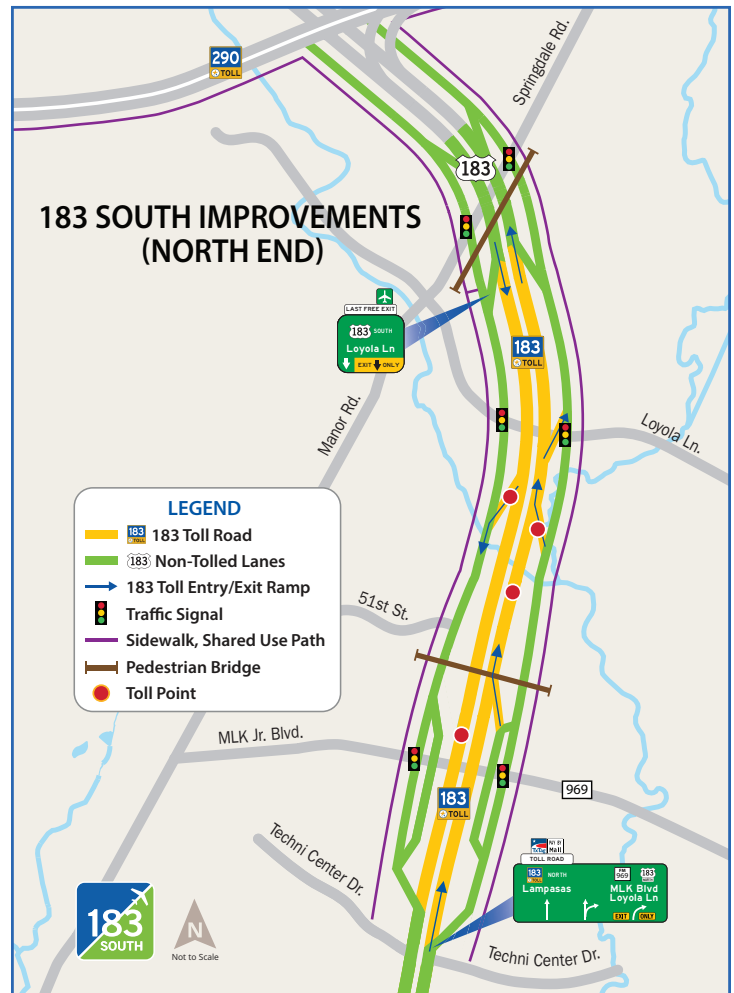

## OPEN NOW: PHASE I

**The northern half of the project is now open to traffic.** Between US 290 and Techni Center Drive, drivers have a choice whether to use the tolled or non-tolled travel lanes. Drivers have an option to bypass the traffic signals at the Loyola Lane and Martin Luther King, Jr. Boulevard intersections. Drivers who prefer not to pay a toll still have the option to use the improved non-tolled general-purpose lanes.

**Drive the north end toll free from August 1 – August 31 with an active electronic tag**
